Purpose of the University

University chronology

TUIT IN NUMBERS

Objective:

- Providing world class education. Achieving sustainable development goals at the national, territorial and international levels through modern research, development of talent and creative leaders, and integration of education and science with production.

Vision:

Future-oriented education - Creativity

- Tashkent University of Information Technologies named after Muhammad al-Khwarizmi is an educational institution that provides students with the academic knowledge necessary to become highly qualified specialists and actively shape the future of our country. The wide range of subjects offered by the university provides students with a modern education and, in turn, represents a solution to social and global challenges. Continuing education lays the foundation for lifelong exploration. The concept of innovation is seen as an important basis for the continuous improvement of the university. The university strives to maintain the quality of education at the level of world requirements, providing continuous training for teachers by supporting dialogue between teachers and students.

Innovative infrastructure of science - Abilities

- The University places an important emphasis on creating strategic alliances with companies, universities and research institutes outside the University, supporting the exchange of knowledge and technology between science and industry. It supports innovation at the university through spin-offs and company creation

Spiritually mature talents - maturity

- The University contributes to becoming part of the regional and national system and finding a place for creative, active and talented professionals in the life of society, and also maintains relations with its alumni, conducting public discussions among students and young people.

Digital University-Transparency

- The concept of a "digital university" is to create a transparent university infrastructure in combination with digital technologies with the aim of moving to data management based on the DDM (Data Driven Management) approach through the creation of new business models for the processes of teaching, science and university management.

Achieving the Sustainable Development Goals - BRM

- The University will continue to contribute to the achievement of the Sustainable Development Goals on a national and international scale, providing modern and high-quality education, conducting scientific research to create new innovative developments.
