On the basis of the Memorandum signed by the National Agency for the Information Society of South Korea (NIA) and the Tashkent University of Information Technologies named after Muhammad al-Khwarizmi, a delegation of volunteers from Sungkyunkwan University visited the Karshi branch of the TUIT. Training sessions on the topic of "Software in ICT" were organized and conducted by volunteers for students of the Karshi branch of the TUIT.

These training sessions are held from July 1 to July 20. Practical training on creating mobile applications for tourists, the Java programming language, the Android operating system, the creation of robotic devices using the Arduino (a device with its own processor and memory in the form of a smaller plateau) were conducted. Students and teachers, who took an active part in training, were awarded with special certificates of leadership of Sungqyungqwan University. At the end of the event, both universities signed a mutual agreement on the exchange of experience and cooperation.

"Of course, I and my students are very happy to visit the Karshi branch of TUIT. We shared our knowledge and experience in training courses, as well as increased our scientific potential. We are pleased to teach programming specifically for robotics to students of the Karshi branch of TUIT. It was also very impressive for us that Uzbek people were hospitable. We liked Uzbek dishes. Special thanks for the hospitality. In the future, we intend to cooperate with the Karshi branch of TUIT "said Professor Hwang Dae Joon from Sungqyungqwan University in his speech.

It should be noted that Sungkyunkwan is the oldest university in South Korea, and this university was founded in 1398. Sungkyunkvan University is one of the top international universities. The university covers such areas as "Arts and Humanities", "Technics and Technologies", "Medicine", "Natural Sciences", "Social Sciences and Management", "Physics" and "Chemistry".
