

Of course, work is a resource for everyone, and for many of us, it is even a pleasure to do the work we love, especially. It is no exaggeration to say that it increases the passion for life. It is not in vain that we put the matter to work, because today one of the most important issues for our young people is employment.

Today's event is the organization of a job fair for students "Job fest 2021". Like all universities, students of Tashkent University of Information Technologies named after Muhammad al-Khwarizmi directly participated in the fair and received the necessary information. They were especially interested in the fact that they have areas of interest. There are some photos from the event.
